***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kataria (U.S. 6385172 B1).
3. Regarding claim 1, Kataria teaches (fig. 5) a method for calculating the probability of a call being blocked in a network having a plurality of routes, comprising: measuring a first probability of a call being blocked on the primary route; measuring a second probability of a call being blocked at the secondary route (Kataria teaches computing the call blocking probability of every link, which reads on measuring the first and second call blocking probabilities), wherein a second incoming call enters the network at the secondary route and the second probability considers the impact of the second call; and summing the first probability and the second probability (col. 7, line 45 0 col. 8, line 47).

***Allowable Subject Matter***

4. Claim 5 is allowed.
5. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberta A. Shand whose telephone number is 571-272-3161. The examiner can normally be reached on M-F 9:00am-5:30pm.
